

Requirements

- Create enough tests to satisfy the following, **use case Greet employees**:
 - A employee can have a **name**, and **last name**. We greet our new employees on this conditions:
 - If both **name** and **last name** are not present the function should **return nil**
 - If **name** is present and **last name** is not present the function should **return** “Hi, + ‘name’”
 - If **name** is not present and **last name** is present the function should **return** “Hello, + ‘lastName’”
 - If both **name** and **last name** are present the function should **return** “Good to see you, + ‘name’ + ‘lastName’”
 - Bonus: Create a simple UI to show the creation of an employee and the further greeting.
